PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Python, and Power BI, delivering data cleaning, exploratory data analysis (EDA), and business recommendations across 500,000+ record datasets, including a real banking/loan portfolio dataset. Skilled in advanced SQL (CTEs, window functions) for risk segmentation, anomaly detection, and data quality assurance, with a strong focus on data integrity and cross-functional stakeholder reporting. Certified in Oracle Cloud AI Foundations and Deloitte Data Analytics; seeking a Data Analyst role applying SQL, Python, and Power BI to data-driven decision-making.

TECHNICAL SKILLS

Programming: Python, SQL
Data Analysis: Pandas, NumPy, MS Excel, EDA, Data Cleaning, Data Quality & Integrity, KPI Tracking, Feature Engineering, Probability & Statistics, Stakeholder & Business Reporting
Big Data & Cloud: Databricks, AWS S3, AWS IAM, Snowflake
Visualization: Power BI, Tableau, Matplotlib, Seaborn, Dashboards
Database: MySQL, PostgreSQL
Productivity Tools: MS Office (Excel, PowerPoint, Word), Visual Studio Code, Jupyter Notebook, GitHub Projects

WORK EXPERIENCE AND INTERNSHIPS

Python Intern | MainFlow Services and Technologies — Jun 5, 2024 – Aug 5, 2024

- Cleaned and transformed raw CSV/Excel datasets into structured, analysis-ready reports; wrote reusable Python automation scripts to replace repetitive manual tasks
- Built automated web scraping pipelines (Python, BeautifulSoup) to extract and structure data, eliminating manual data collection
- Developed a billing system application (invoice generation, calculation automation) and a currency conversion tool with live-rate integration

PROJECTS

EduFin SQL Investigation Case — Loan Portfolio Risk Analysis | SQL, Databricks | GitHub

- Investigated a 500,000-row real production banking loan dataset on Databricks, applying data quality assurance to identify planted data anomalies and assess portfolio risk
- Built advanced SQL queries (CTEs, window functions/LAG) to segment risk by credit score, income, and age and model default acceleration, pinpointing an Oct 2022 crisis threshold with cumulative defaulted loan amount reaching ₹944.38 Cr by Jun 2023
- Profiled a separate sample dataset to baseline portfolio health (₹204.82 Cr portfolio, 11.8% default rate, ₹35.18 Cr default exposure) before the production analysis
- Delivered data-driven business recommendations (lending freeze, collections prioritization, underwriting control restoration) to support stakeholder decisions

Telco Customer Churn Analysis | Python, SQL, Power BI | GitHub

- Analyzed 7,000+ customer records, identifying a 26.54% churn rate and $139.13K/month (30.5%) revenue at risk, with month-to-month contracts, fiber optic, and electronic check as top drivers
- Found that low-tenure, high-charge customers churn at 41.18% and that service adoption cuts churn from 44% to 2%
- Delivered recommendations (contract incentives, fiber improvements, payment migration) to reduce revenue leakage

Netflix Content Analysis Dashboard | Python, Power BI | GitHub

- Performed EDA in Python (Pandas, Matplotlib, Seaborn) and cleaned raw data (missing values, multi-value fields)
- Designed a 3-page Power BI dashboard analyzing Netflix's content library by type, genre, rating, and country, surfacing trends such as 69.7% movies vs. 30.3% TV shows and India's catalog being 92% movie-dominant

Energy Consumption Analysis Dashboard | AWS, Snowflake, SQL, Tableau | GitHub

- Built an end-to-end ETL pipeline (AWS → Snowflake → SQL → Tableau) to analyze energy consumption (KWH) and service usage (CSU) across countries and regions
- Found Australia highest in energy use (80,410 KWH), rural areas 5% higher than urban, and Wind as the top source
- Delivered the results in an interactive, dual-view Tableau dashboard for cross-market stakeholder comparison

EDUCATION

Roland Institute of Technology — B.Tech (ECE) | CGPA: 8.5 — 2022 – 2026
Khallikote Higher Secondary School — Intermediate | 71% — 2020 – 2022
C D T Vidya Mandir — Secondary | 85% — 2019 – 2020

CERTIFICATIONS

Data Analytics Job Simulation — Deloitte (virtual job simulation) | OCI AI Foundations Associate — Oracle
Data Fundamentals — IBM | SQL Basics — HackerRank | SQL 50 — LeetCode
